

# How will the Police, Crime, Sentencing and Courts Act affect you?

## WELFARE ENQUIRY: PART A

## Context

Before you begin completing this form, it is essential that you acknowledge and respect the context within which this conversation takes place. The potential of eviction is likely to cause high anxiety and distress for those you will speak to.

It is important to understand and specify the action being taken by the Police or Local Authority against the individual, family or community, including timescales and deadlines for eviction/prosecution/confiscations of vehicles.

Discuss the action of police or landowner and record the detail of the directions that have been given to the individual and family. Understanding the full scope of the eviction is very important.

Consider the circumstances in which the conversations take place and read key documentation (if any) that has been presented to support the eviction. Consider the timing of the eviction and how it impacts on the welfare of those involved.
